John has been shooting landscapes with a large-format, 4" x 5" film camera for over 20 years. His work has been shown in the US, Australia, & Japan.

He concentrates mostly on simple scenes, exquisitely composed, with fine lighting and highly detailed.

*"My preference, rather than a big vista with dramatic lighting, is to see simpler, more common landscapes from a perspective of reverence for the subject as the finely balanced ecosystem that Nature's created."*
