CONTRASTS & EQUILIBRIUMS

Escaping from the concrete world of tasks and challenges sometimes overwhelming me, I jump into creating my art. I find a balance within myself during the process of painting, drawing, mixing media, and connecting with unconscious things that come up. Studying brush calligraphy many years

ago ignited a love for the beauty of a simple stroke. The quickness, slowness, weight, and curve of the line continue to excite me. I find contrasts and equilibriums in my creative process and in my life experiences. My art connects me with my spirit, my soul. Visit the artist's website: nancyhdempster.com.
